Drive Your AP Automation with MediusFlow

Total Visibility and Control of AP
 Unprecedented access to data combined with powerful reporting capabilities allows both finance teams and management to get a clear financial picture of the business, identify process improvements and make informed business decisions.

Speed of Deployment Leading to Quicker ROI
 Our cloud-based solution, AP-specific experience, best practice approach and ERP connectors ensure a rapid and seamless deployment – often within just days or weeks rather than months – leading to a quick return on investment.

Increased AP Efficiency
 With industry-leading invoice automation and matching capabilities, MediusFlow dramatically improves approval times for invoices. This allows for fully automated, touchless, invoice processing that is measured, monitored and tracked using performance KPIs and benchmarks in order to identify process improvement opportunities.

Best Practice AP Workflow Automation Derived from Experience
 AP Automation is our singular and relentless focus. With over 17 years in the industry and 2,500+ current customers, our team of AP experts are devoted to helping customers strategically optimize this critical business function.

Medius is a leading provider of AP invoice automation solutions in the cloud. We serve over 2,500 customers worldwide with over 150,000 unique users of our cloud solutions with high density in retail and manufacturing. Founded in 2001, Medius now has 220 employees working out of offices in Sweden (HQ), the United States, Australia, Denmark, Norway, Poland and the Netherlands.
